

SHARING AN INVENTION

OBJECTIVE

- Have students creatively express themselves and apply their historical/scientific knowledge at the same time by altering a famous inventor's invention or scientist's discovery with their own input

CURRICULUM

- Science
- History

MATERIALS

- White Art Paper
- Laurentien Classic Markers
- Laurentien Vibrant Markers
- Laurentien Coloured Pencils

DIRECTIONS

- Have the students identify their favourite inventor
- Have the students think about their favourite invention
- What would it look like if you had worked with them and provided your own input on their greatest invention?
 - What would change?
 - What would they add?
- Have the students draw their selected invention including their modifications

TRY THIS: Discuss with your class several different inventors and what they did so that the students will have a variety to choose from
